Profile

I am a motivated and adaptable professional with a strong foundation in customer service and a growing passion for software development. I enjoy working in team-oriented environments where collaboration, problem-solving, and continuous learning are valued. My experience with languages like Java, Python, and C, along with my commitment to staying current with industry trends, helps me bring both technical curiosity and reliability to any role. I take initiative, work well independently, and consistently strive to exceed expectations while contributing positively to the workplace.

EDUCATION

(AA) Computer Science, College Of Southern Nevada 2018 – 2024
Las Vegas, NV

Computer Science (AA) at CSN focuses on preparing students to transfer into a university and complete a bachelor’s degree in Computer Science. The program builds strong foundations in programming, problem-solving, and analytical thinking. Students learn how to analyze computing problems, determine appropriate solutions, and design, build, and improve computer programs. The curriculum emphasizes essential programming skills and the core concepts needed for success in advanced computer science studies.

Software Engineering, UNLV 06/2025
Las Vegas, NV

At UNLV, the Software Engineering program focuses on teaching students the core foundations of modern software development. Students gain strong skills in programming languages such as Java, Python, C++, and JavaScript, while also learning essential concepts like algorithms, data structures, databases (SQL and NoSQL), data modeling, APIs, and system integration.

The program also emphasizes system and software architecture, preparing students to:

- Create system designs and technical specifications
- Evaluate performance, scalability, and security of applications
- Work with cloud infrastructure and modern CI/CD pipelines

WORK EXPERIENCE

Call Center Representative, Intouch 04/2025 – 01/2026
las Vegas, NV

- Answering Inquiries: Responding promptly and accurately to customer questions and concerns.
- Resolving Issues: Addressing and resolving customer complaints and problems efficiently.

- Providing Information: Offering detailed information about products and services.
- Order Management: Assisting with order processing and tracking.
- Customer Satisfaction: Ensuring a high level of customer satisfaction by understanding and meeting customer needs.
- Generating Leads: Identifying potential sales opportunities and generating leads for new customers.

Merchant Processor, Enhanced payments systems

11/2023 – 04/2024

- Establishing and maintaining merchant accounts for businesses that want to accept electronic payments.
- Providing payment terminals, software, or online platforms for merchants to process payments.
- Ensuring compliance with payment industry standards and regulations, such as PCI DSS, EMV, and GDPR.
- Handling chargebacks, disputes, refunds, and fraud prevention.
- Offering customer service and technical support to merchants and their customers.
- Analyzing transaction data and providing insights and recommendations to merchants.
- Developing and marketing new products and services to attract and retain merchants

Call Center Representative, Foundever, USSA

07/2023 – 11/2023

- Serve as the primary point of contact for clients, ensuring high-quality customer service.
- Handle interactions with customers, clients, and third-party contacts, addressing complaints and inquiries.
- Proactively take initiative and follow established procedures, processes, and systems to resolve customer issues effectively.

Back End Software Developer, Promineo Tech (CSN)

01/2023 – 06/2023

At Promineo Tech, the goal is to help students master the fundamentals of back-end development, including server-side programming, databases, APIs, debugging, and system design. The program focuses on building real technical skills through hands-on practice and project-based learning.

Students learn how to:

- Write and debug code using Java
- Build functional web applications
- Create, manage, and integrate APIs
- Troubleshoot and optimize code
- Work with SQL and develop database-driven applications

MEP Linux machine operator, Interebar

03/2018 – 07/2023

- Conduct quality and functionality inspections of machines and production processes.
- Diagnose and repair any operational issues.
- Maintain detailed records of machine repairs, malfunctions, production output, waste, and maintenance activities.
- Operating a crane to maneuver equipment and materials to the designated location.

SKILLS

Software Developer

- Java
- Python
- C programming
- SQL & relational databases
- API development & integration
- Debugging & troubleshooting
- Object-oriented programming (OOP)
- Version control (Git/GitHub)
- Web application development

Communicative

- Strong teamwork and collaboration
- Problem-solving and analytical thinking
- Self-motivation and independence
- Adaptability and willingness to learn
- Communication with technical peers
- Attention to detail
- Time management and reliability
